

ESP Show Feeds

ESP SHOW GROWER 50-150

A complete meal feed designed for pigs from 50-150 pounds. This feed is 19% Protein, 1.35% Lysine and 3.5% Fat. This is the most critical stage in your pig's life; daily consumption and growth rate are so important. In this stage of a pig's life, we are setting the table for all future actions – good or bad. It utilizes our Poultry Protein and ESP Liquid Energy to drive the pig to maximum intake and growth rate.

Non-medicated.

ESP GROWER 16/5

A complete meal feed designed for a softer, more tranquil growth pattern. This feed is 16% Protein, 1.0% Lysine and 5% Fat. Using the Main Event Mixer, ESP Liquid Energy and Soy Oil makes this a very simple but high quality feed that helps give the pigs a fuller, softer fresher look.

Non-medicated.

ESP BLAST 7.0

ESP Blast is a 17% Protein, 1.0% Lysine and 7.0% Fat complete meal feed. Designed for feeding in cooler weather, it is very high in energy and will greatly aid you in the adding cover to your pig. Again, this complete feed utilizes our Poultry Protein and Soy Oil is the energy source. This feed is designed to follow the Grower 50-150 and is especially formulated to work as the weather cools as the pigs can and will utilize greater amounts of energy.

ESP Specialty Show Products

ESP MUSCLE MAKER W/PAYLEAN

A great product to aid in the shaping and molding of your show pig. There simply is not another product on the market today that will add muscle shape along with daily gain than ESP MUSCLE MAKER. Studies have shown that to get the best results using PAYLEAN you need several things: higher protein, added Biotin and greater fat levels. ESP MUSCLE MAKER is a 50% Protein, 3.0% Lysine and 12% Fat product that when mixed and blended with 5 pounds of feed delivers 9 gram/ton of PAYLEAN. This product is available in a 25 pound bag and will deliver 100 – 9 gram feedings.

ESP BODY BUILDER

Often imitated but never duplicated! ESP BODY BUILDER is the original hold and fill formula. Everything you need to add mass, volume and extra capacity to your show pig is in the product, when fed at 1 pound per day. A unique blend of high quality, highly digestible proteins (spray dried whey, spray dried blood, menhaden fish meal, spray dried egg and Hi-Pro Soybean meal) along with 2 sources of fat and several high fiber ingredient makes this product, one of a kind, along with the above mentioned products.

ESP SYNERGY:

"The combined effort being greater than the individual parts. The working TOGETHER of two or more people, organizations or things especially when the result is GREATER than the INDIVIDUAL capabilities."

The Elite Swine Program

“A STEP AHEAD”

Beginning in 2006, THE ELITE SWINE PROGRAM, has had one goal – Manufacture and deliver the highest quality base mixes and complete feed expected by our customers. We use only the highest quality ingredients to make our base mixes. They are made in one centrally located place and more importantly manufactured by the same person – every bag, every ton. Understand – being the BIGGEST is not our goal. Being the BEST is.

We have researched and tested new and innovative ingredients utilizing them to clearly set our customers apart. For instance, our Starter and Show Feeds are made with a very unique product we call POUTEN – a very palatable, highly digestive premium protein that allows us to remove a large portion of the very high priced protein sources as Spray Dried Blood and Fish Meal. In turn, allowing our customer base to enjoy high quality products at a much lower cost simply helping to make them more profitable.

Another innovative product we use is called ESP ALCOMP HIGHENERGY. This unique product allows us to remove almost all energy sources such as Soy Oil, Choice White Grease and Vegetable Oil from Starter and Sow Lactation diets. ESP ALCOMP HIGH ENERGY is INSTANT ENERGY – available as soon as the pig consumes it. Whereas other energy sources take hours, even days to fully digest. To top all this, pigs love it and this product really allows us to drive intake, raise consumption of feed and therefore have dramatic nursery gains compared to our competition. Several other things make it unique – 1) it will not freeze or gel in the coldest of weather; 2) it will never go rancid; 3) AND we think just as important – half the cost of most other energy sources.

*Please take time to look at the brochure
and call if you have any questions.
We look forward to hearing from you.*

ESP Nutrition Program

ESP SOW 100

A base mix designed at the inclusion rate of 100 pounds per ton. ESP SOW 100 is utilized in both gestating and lactating diets by simply increasing or decreasing the protein and energy. No other add packs are needed. It is a simple but very effective nutritional program for your sows.

ESP 50P

A finishing base mix for pigs weighing 70 pounds to market weight. ESP 50P has 3 pounds of added Lysine so all you have to do is adjust the protein and energy levels as the pigs grow. In Bulk loads this products is called 45P.

ESP 40P

For those customers who want to utilize DDGS when they are cost effective, we developed this product. This product will allow you to feel assured that, nutritionally speaking, all the critical vitamins and trace minerals are present.

Starter Pellets

ESP PHASE 1 PELLETS

A highly effective pellet designed for pigs as young as 10 days old. This pellet is fortified with over 800 pounds of high quality, palatable protein product such as Whey, Spray Dried Blood, Kulactic, Poultry products and whole ground oats. Commercially we recommend approximately 1 pound of these pellets per pig to get them started quickly. The drug of choice in the pellet is CTC/DENAGARD.

ESP PHASE 2 PELLETS

This is specially designed to follow the Phase 1 Pellet and is fed at 2 pounds per pig commercially. With the same protocol of high quality proteins we are preparing the young pig for the first option of our high quality mixer program. Again, the drug of choice is CTC/DENAGARD.

Starter Grind & Mix Program

ESP PHASE 2 MIXER

This starter feed is the mainstay of our commercial feed program. At a 450 pound inclusion per ton, everything the nursery pig needs to accelerate growth is included in the program. Commercially we recommend 20 pounds of this product per pig before moving to the Phase 3 feed. Of course, each situation will be different so that decision will be up to you. THERE IS NOT A BETTER PHASE 2 FEED ON THE MARKET TODAY. This feed is designed for pigs weighing 15-35 pounds.

ESP PHASE 3 MIXER

A mixer designed for pigs 35 pounds until they leave your nursery. At 100 pound inclusion per ton, increased use of corn and bean meal as the pigs are now ready to utilize less complex ingredients. Highly palatable and increased gains are what Phase 3 mixer allows your pigs to do. You will not be disappointed with the results.

ESP Show Feeds

MAIN EVENT MIXER

The Main Event Mixer is the base mix for all of our ESP Show Feeds. It utilizes the highest quality ingredients that drive consumption and intake, allowing your pigs to maximize growth and to reach their full genetic potential. It contains our own high quality premium poultry proteins that pigs just love to eat. Make no mistake – there is a difference in the quality of ingredients that go into show feeds. A 100 pound inclusion allows you to add your corn, bean meal and energy source for a top of the line, competitive show feed.
