

**ESP
SPECIAL K**

Special K feed is developed especially for show goats. This feed is designed to be fed while using an exercise program. When fed properly, goats will handle with a fresher handle.

GUARANTEED ANALYSIS

Protein, not more than.....16.00%
Crude Fat, not less than.....4.00%

INGREDIENTS

Alfalfa/corn/soybean meal, ammonia chloride, calcium/phosphorous

FEEDING INSTRUCTIONS

With a higher fat content, there has to be an exercise program in place for wethers, unless you are creeping feeding and wanting to bloom goats. Feed wethers up to 1 pound per feeding, twice a day. Feed free choice as a creep feed. For show does, feed 1 to 1 1/2 pounds per feeding, twice a day. Also keep fresh, clean water available at all times. As this feed is high in energy, it works well when "holding" goats. When holding a wether, feed 1/4 to 1/3 pound per feeding, twice daily. monitor condition weekly and adjust feed amounts as needed.
